

FREQUENTLY ASKED QUESTIONS

December 2009

1. When will construction begin?

Some smaller construction/remodeling projects will begin later this spring. The larger building additions likely will begin this summer after the end of the 2009-10 school year.

2. Will construction be completed before the end of next school year?

Many of the smaller projects will be completed in the summer of 2010. Major building additions are scheduled for completion before the beginning of school in the fall of 2011.

3. Which projects will be tackled first?

The exact sequence of projects is still being determined. Those projects least dependent on the completion of other projects and of relatively short duration likely will be completed earliest in the project sequence. Most projects are scheduled to begin and in many cases be completed between the end of the 2009-10 and the beginning of the 2010-11 school year.

4. Will all three buildings be renovated simultaneously or will they be worked on one at a time?

The three large projects, cafeteria/multipurpose space at the two elementary schools and the high school music classroom addition will occur simultaneously. In addition, most of the smaller projects at all three buildings, while not necessary occurring simultaneously, likely will be completed within a matter of a few months once the projects begin in late spring or early summer.

5. How will building access be different for students and families once the new entrances are in place?

For the most part students will be entering the schools through existing entrances. The exceptions will occur at the elementary schools where new entrances will be a part of the cafeteria/multipurpose room construction. The new entrances will allow students to enter from and exit the cafeteria directly to the playground.
