

Dear Parents,

Math Home Links are a great way for you to know what your second grader is working on in Math class. They provide an opportunity for you to discuss math ideas, concepts, and strategies with your child. Please remember to sign the Home Link paper- this indicates to me that you have talked about this assignment with your child and you know they did their best work. If your child has trouble with any of the work, please write a note to me (on the page) and I can review the concepts with your child at school the following day.

Thanks for your support! I am impressed with what the students are doing in math.... and how much they enjoy the challenging activities

Please let me know if you have questions or concerns related to math.

Respectfully,

Mr. Lazovik
