

Chapter 9 Percents

9.5 Circle Graphs

Pages 474-479

NOTES (9.5) Circle Graphs

A **circle graph** displays data as sections of a **circle**.

Review

Ray part of a line $\circ \longrightarrow$

Angle two rays that share a common point called a **vertex**

Angles are measured in **degrees**

Circles = 360° so the sum of all angle measures must = 360°

Note examples 2 & 3 on pp 475-476
