Important Information

Security alarms will be set and active outside of the hours of operation. Staff may NOT be in the building during these times.

Individuals who access the buildings on weekends are responsible for the security of the building and must ensure that doors are secured upon entering and exiting.

Notice of holiday building hours will be provided when they vary from above.

Under certain circumstances it is possible to make exceptions to the stated hours and allow employee access outside of the normal business hours. This can be done only with advanced approval through the Buildings and Grounds department.
